# Uniquely anodized

**AnoMax** is a range of pre-coated finishes on aluminum that complies with industrial anodizing standards. AnoMax sets itself apart from anodizing by offering great color consistency, extensive warranties and an economical price for coil coating.

Pre-coated finishes offer great flexibility for bending, resulting in enormous panel versatility. Add to this the possibility to create your own individual AnoMax color, and custom anodizing becomes a reality.

## Benefits over anodized aluminum

- Excellent color consistency & durability
- Flexibility for bending and roll-forming
- Price economy
- Sustainability

## Choose sustainable pre-coated aluminum

On average, twice as much recycled content is used in pre-coated aluminum alloys as is used in real anodized aluminum alloys. This makes a huge difference, considering that recycling requires only 5% of the energy of primary aluminum production.

## Guidelines

- Install panels in the same direction to avoid reflection differences
- Order projects in one batch to avoid color differences
- Many other colors available on [www.euramax.eu](http://www.euramax.eu)

## EURAS standard anodizing colors

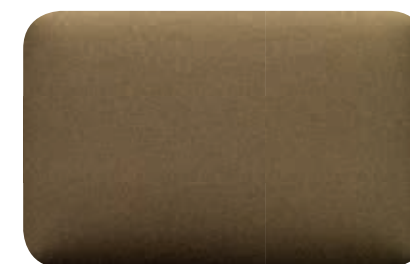

**AnoMax 2L**
