(2005PVDF cc G30)

Euramax is a coil coating specialist

Our pre-coated metals colour all kind of products, from building facades to household appliances. Euramax runs coil coating lines in the Netherlands and the United Kingdom with an annual production of over 15.000 km that is supplied to customers and projects across the globe.

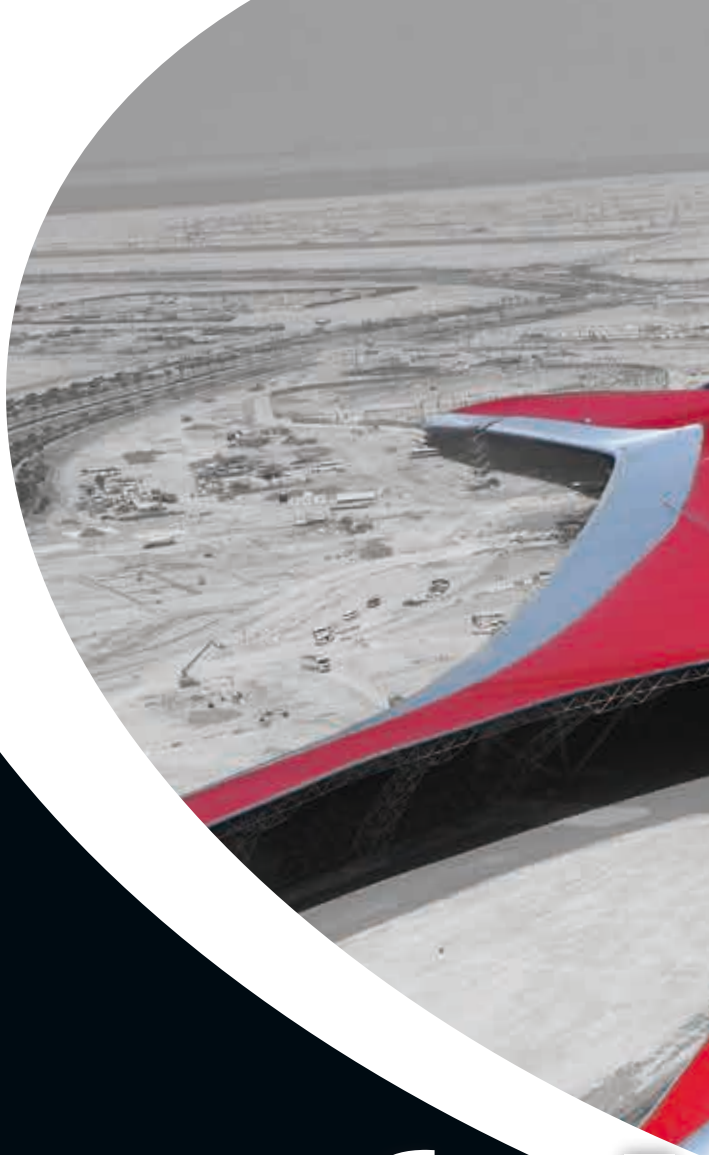

Passion

As premium coil coating company we have only one thing on our mind: how can we colour the world and thus making it a more exciting and enjoyable place to live in?

We believe through inspiring the people who design and build our world, like architects, designers and constructors.

We strive to make better, more beautiful buildings

Our coil coated surfaces blend aesthetic choice and environmental friendliness. Euramax offers truly innovative design solutions. Share your ideas with us and we will help you with passion.

Colourful buildings

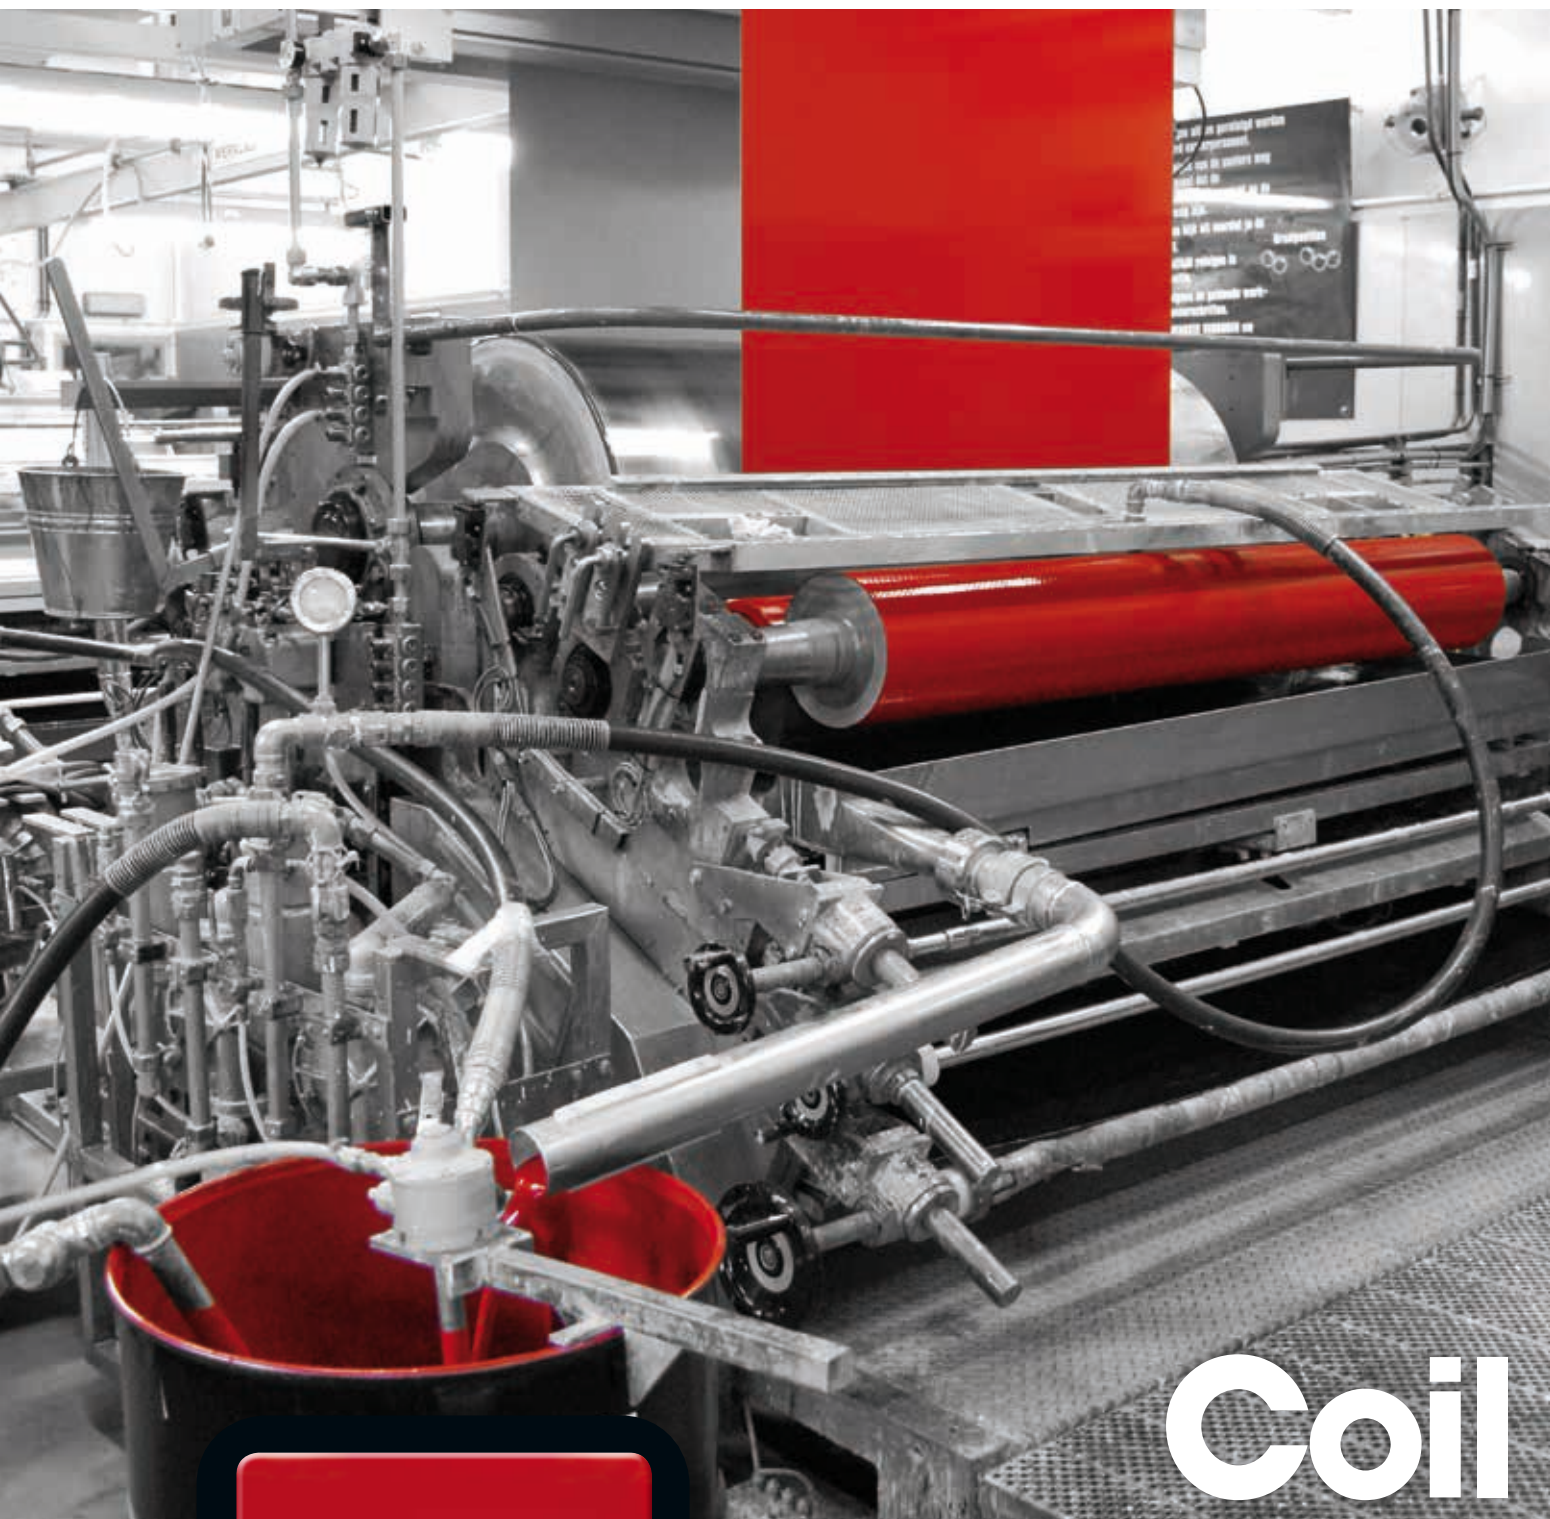

Coil coating or pre-painting is the process where large metal coils are coated in a continuous, highly automated process prior to final fabrication steps. Benefits are multiple. Painting metal 'in the flat' provides a uniform, smooth paint layer. Cleaning, pre-treatment and paint application are optimal in coil coating facility environments leading to an unquestionable advantage in durability and sustainability.

Euramax program

- All aluminium alloys and tempers (steel on request)
- Widths from 35 to 2630 mm
- Thickness from 0.30 to 2.00 mm
- All colours and glosses (RAL, NCS, BS and Pantone)
- Customized colours and designs
- All coating systems (PVDF / FEVE / PUR-PA / HDP / PE)
- Available in coil, slit coil and sheets
- ISO 9001 and ISO 14001 certification
- Production according to ECCA and NEN-EN standards
- Aluminium = 100% recyclable
- Coil coating = green technology

Coil coating

EuraBuild PVDF 4L Lum
Ferrari Red
(30Q0584.30 + 30Q0586.30 + 90N2256.90)

Ferrari World - Abu Dhabi - UAE

The largest pre-coated aluminium roof in the world
($\approx 220.000 \text{ m}^2$), coated by Euramax in high gloss
Ferrari Red and Silver.
