

Zinc re-invented

EuraZinc

Color your world with Euramax

EuraZinc is a unique self weathering zinc finish in pre-coated aluminum. Zinc particles in the topcoat allow the coating to change over time from an initial light grey finish to a dark and natural weathered zinc finish.

EuraZinc saves over 60% of weight in comparison to real zinc and is more price attractive. On top of this EuraZinc allows you to fully exploit the cladding versatility of pre-coated aluminum. Whether you choose for aluminum composite panels, insulated panels or trapezoidal profiles; all are new combinations re-inventing and re-shaping the possibilities of zinc.

Guidelines

- Weathering depends on local climate conditions
- Weathering behaviour may slightly vary for different sections of the building
- More information available on www.euramax.eu/eurazinc

Benefits over real zinc

- Price attractive
- Save 60% of weight
- Cladding versatility of pre-coated aluminum
